

determinism, realism, and probability in evolutionary theory - determinism, realism, and probability in evolutionary theory marcel webertt universitat hannover recent discussion of the statistical character of evolutionary theory has centered around **statistical evolutionary laws in music styles - arxiv** - statistical evolutionary laws in music styles eita nakamura1 and kunihiro kaneko2y 1 graduate school of informatics, kyoto university, sakyō, kyoto 606-8501, japan

determinism, realism, and probability in evolutionary ... - this statistical nature of evolutionary theory raises a number of foundational and philosophical problems. one question is how the concept of probability, as it appears in evolutionary **asymptotic statistical inference for nonstationary ...** - asymptotic statistical inference for nonstationary processes with evolutionary spectra r ... relation to priestley's theory of processes with evolutionary spectra is dis- cussed. 1 introduction stationarity has always played a major role in time series analysis. for stationary processes there are a large variety of models, such as arma- models, and powerful techniques, such as bootstrap ...

interpretations of probability in evolutionary theory - evolutionary theory is teeming with probabilities. probabilities exist at all levels: the level of mutation, the level of micro- evolution, and the level of macroevolution. **linking evolutionary and ecological theory illuminates non ...** - and/or statistical theory to investigate changes over geologic time in community assembly mechanisms [28, 63]. while these studies have documented interesting shifts in assembly mechanisms, including departures from equilibrium likely resulting from evolutionary in- novations, understanding exactly how the evolution of innovation is responsible for these ... **vlfv evolutionary dynamics: evolutionary** - between statistical evolutionary theory and statistical physics, to review recent progress, and to raise questions for future research. we have grouped these articles into three **is indeterminism the source of the statistical character ...** - the theory is statistical and the processes are indeterministic, then it is statistical because of the indeterminacy, but if the theory is statistical and the processes are determinate, then the statistics reflect something else). **physical foundations of evolutionary theory - helsinki** - physical foundations of evolutionary theory 303 circumstances. the former dates back to descartes, fermat, pascal, and others in the context of gambling, and the latter originates from bayes in **evolutionary personality psychology - lars penke** - theories such as self-verification theory, self-enhancement theory, and social identity theory in a theoretical vacuum, uninformed by, or indifferent to, the causal processes that created the psychological mechanisms involved. **nonparametric kernel estimation of evolutionary ...** - nonparametric kernel estimation of evolutionary autoregressive processes 1 woocheol kim* this paper develops a new econometric tool for evolutionary auto- regressive models, where the ar coefficients change smoothly over time. to estimate the unknown functional form of time-varying c oeffi- cients, we propose a modified local linear smoother. the asymptotic normality and variance of the new ... **point of view towards a mechanistic foundation of ...** - processes, in which individuals give birth and die at ever-changing rates, should be the basis of evolutionary theory, because such processes capture the fundamental events that generate evolutionary dynamics. **evolutionary psychology and the emotions - semantic scholar** - an evolutionary psychological theory of the emotions an evolutionary perspective leads one to view the mind as a crowded zoo of evolved, domain-specific programs. **journal of statistical mechanics: theory and experiment ...** - evolutionary games on some simple topologies namely, star, cycle, and all-to-all net- works [14]. the $\tilde{\mathcal{A}} \rightarrow \mathcal{A}$ field remains an active one with a number of important unsolved ques- **the need for an application of dual-process theory to ...** - finally, the evolutionary perspective of the two processing types, which is seen as a prominent contribution to dual-process theory, has also been included.
